Mr E. F. Lofgren.
Capitol Bldg.,
Salt Lake,
Utah.

Dear Sir:-

In carrying out your orders I report as follows in regard to the petitioners Carter, Young and Carey.

May first about five O'clock I called up the Duchesne Hardware and ordered the lumber and nails for the splitter and the next morning we put it in according to your plans finishing about six oclock P.M. so we did not have time to go up the creek and carry out your written order ~~will~~ today.

until The splitter isent working as it should and we all got together there this morning and inclosed is the findings on a seperate sheet.

Up the ditch about 1/4 mile ~~where the~~ above the splitter Youngs had a small stream turned out by cutting the bank. It was the stream you crossed just as you got down the Dugway. We shut it off as it was not allowed for on the splitter.

How should we handle the water to get the proper division when they take water out above?

On a seperate sheet you will find a record of readings with map of our splitter troubles.

Futters came to see me this morning and I showed him you letter and showed him how to take the readings and tabulate them.

and told him to keep a record of any water out that ~~such~~ should not be as to day , hour and estimated amount.

We did not talk to Muirs but saw them at the ranch.

Thanking the State Engineers Office for past service and hoping it will continue ~~will~~ the matter is finally adjusted
until
I am

Very truly yours

James E. L. Carey
